Your Score

ACT College Readiness Benchmarks

If your score is at or above the Benchmark, you have at least a 50% chance of obtaining a B or higher or about a 75% chance of obtaining a C or higher in specific first-year college courses in the corresponding subject area. There is currently no Benchmark for ELA or writing.

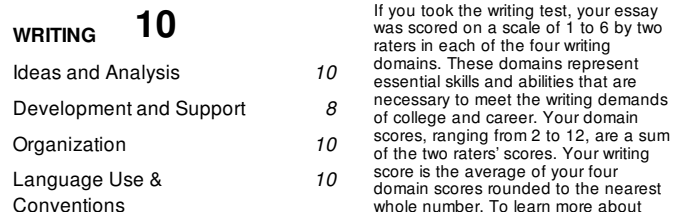

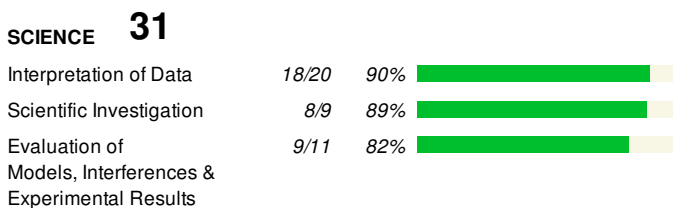

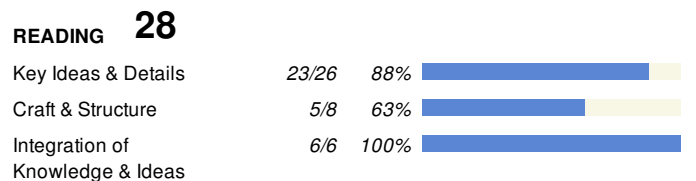

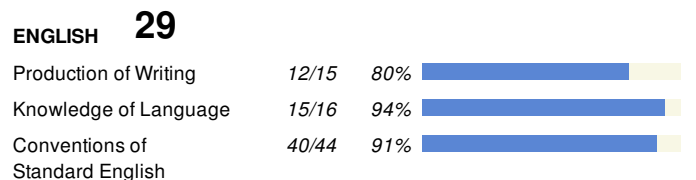

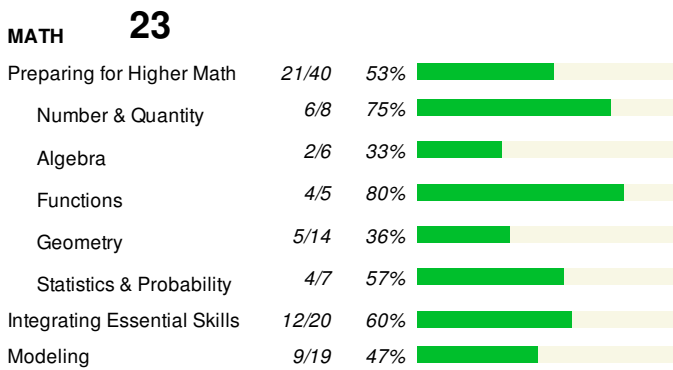

US Rank

US Rank

Your ranks tell you the approximate percentages of recent high school graduates in the US who took the ACT® test and received scores that are the same as or lower than your scores. For example, a rank of 55 for your Composite score means 55% of students earned that Composite score or below.

Detailed Results

If you took the writing test, your essay was scored on a scale of 1 to 6 by two raters in each of the four writing domains. These domains represent essential skills and abilities that are necessary to meet the writing demands of college and career. Your domain scores, ranging from 2 to 12, are a sum of the two raters' scores. Your writing score is the average of your four domain scores rounded to the nearest whole number. ACT math, science, English, and reading test scores and the Composite score range from 1 to 36. For each test, we converted your number of correct answers into a score within that range. Your Composite score is the average of your scores on the four subjects rounded to the nearest whole number.
